Load Cells

Compression Load Cell XJC-Y01-20-4M

Product Description:

- XJC-Y01-20-4M adopts high-precision resistance strain principle;
- Meet force measurement in the range of 0-1000kg;
- Capsule structural design, pressure-bearing, easy to install;
- High quality stainless steel material;
- Small size, beautiful appearance;
- High response frequency;

Compression Load Cell XJC-Y02-3M

Product Description:

- XJC-Y02-3M adopts high-precision resistance strain principle;
- Meet force measurement in the range of 0-12T;
- Capsule structural design, pressure-bearing, easy to install;
- High quality stainless steel material;
- Small size, beautiful appearance;
- High response frequency;

Compression Load Cell XJC-Y03-4M

Product Description:

- XJC-Y03-4M adopts high-precision resistance strain principle;
- Meet force measurement in the range of 0-15T;
- Oil, water, corrosion resistance;
- Capsule structural design, pressure-bearing, easy to install;
- High quality stainless steel material;
- High response frequency;

Compression Load Cell XJC-Y03-80

Product Description:

- XJC-Y03-80 adopts high-precision resistance strain principle;
- Meet force measurement in the range of 0-30T;
- Oil, water, corrosion resistance;
- Pressure-bearing, easy to install;
- High quality stainless steel material;
- High response frequency;

Compression Load Cell XJC-Y01 Series

Product Description:

- Pressure bearing, easy to install and use ;
- can be used in harsh conditions and dangerous occasions;
- High dynamic response frequency

Compression Load Cell XJC-Y01-9.5

 A cylindrical stainless steel load cell with a central threaded rod and nut. A cable with a connector is attached to the side. The brand name 'XJ SENSOR' is engraved on the side.	Product Description: • XJC-Y01-9.5 adopts high-precision resistance strain principle; • Meet force measurement in the range of 0- 50kg; • Capsule structural design, pressure-bearing, easy to install; • High quality stainless steel material; • Small size, beautiful appearance; • High response frequency;
--	---

Compression Load Cell XJC-H30

 A cylindrical stainless steel load cell with a central hole. A cable with a connector is attached to the side. The brand name 'XJ SENSOR' is engraved on the side.	Product Description: • XJC-H30 adopts high-precision resistance strain principle ; • Meet force measurement in the range of 0-200kg; • Pressure-bearing, easy to install; • Small size, beautiful appearance; • High response frequency, high-precision ;
--	---

Compression Load Cell XJC-H25 Series

 A cylindrical stainless steel load cell with a central hole. A cable with a connector is attached to the side. The brand name 'XJ SENSOR' is engraved on the side.	Product Description: • Stainless steel material, oil-proof, waterproof and anti-corrosion; • Can be used in harsh conditions and dangerous occasions; • Ring structure, compression bearing, easy and flexible to use and install; • High dynamic response frequency, high precision and good stability; • Low height.
--	--

Compression Load Cell XJC-H80

Product Description:

- XJC-H80 adopts high-precision resistance strain principle;
- Meet force measurement in the range of 0-5T;
- Oil, water, corrosion resistance;
- Pressure-bearing, easy to install;
- High response frequency, high-precision ;

Compression Load Cell XJC-S07-Q-15

Product Description:

- XJC-S07-Q-15 adopts high-precision resistance strain principle
- Meet force measurement in the range of 0-50 kg .
- Compression and tension, easy to install and flexible.
- Small size, beautiful appearance

Compression Load Cell XJC-Y08

Product Description:

- XJC-Y08 adopts high-precision resistance strain principle;
- Meet force measurement in the range of 0-100kg;
- Pressure-bearing, easy to install;
- High quality stainless steel material;
- High response frequency;

Compression Load Cell XJC-Z15-H9-2M

Product Description:

- XJC-Z15-H9-2M adopts high-precision resistance strain principle;
- Meet force measurement in the range of 0-20kg;
- Pressure-bearing, easy to install;
- Small size, beautiful appearance;
- High response frequency, high-precision

Compression load cell XJC-Z-U3

Product Description:

- Meet force measurement in the range of 0-10T ;
- Oil, water, corrosion resistance;
- Pressure-bearing, easy to install;
- High response frequency;

Tension and Compression Load Cell XJC-S07-B

Product Description:

- XJC-S07-B adopts high-precision resistance strain principle
- Meet force measurement in the range of 0- 50kg。
- S structural design, compression and tension, easy to install and flexible.
- High precision and high stability
- Small size, beautiful appearance

Tension and Compression Load Cell XJC-S08

Product Description:

- XJC-S08 adopts high-precision resistance strain principle.
- Meet force measurement in the range of 0- 30T.
- Oil, water, corrosion resistance.
- Wheel-shape, beautiful appearance.
- High dynamic response frequency.

Compression Load Cell XJC-H120

Product Description:

- XJC-H120 adopts high-precision resistance strain principle;
- Meet force measurement in the range of 0-5T;
- Pressure-bearing, easy to install;
- High response frequency;

Compression Load Cell XJC-S02

Product Description:

- XJC-S02 high-precision resistance strain principle;
- Can meet force measurement in the range of 0-20T;
- S structural design, compression and tension, easy to install and flexible

Tension and Compression Load Cell XJC- S06

	Product Description: • XJC- S06 high-precision resistance strain principle • Can meet force measurement in the range of 0-10T. • Oil, water, corrosion resistance • S structural design, compression and tension, easy to install and flexible.
---	---

Tension and Compression Load Cell XJC-S05-13

	Product Description: • XJC-S05-13 high-precision resistance strain principle • Can meet force measurement in the range of 0- 50 kg . • Sealed welding, oil, water, corrosion resistance • Compression and tension, easy to install and flexible. • Small size,beautiful appearance
--	--

Compression Load Cell XJC-Y01-13-A

	Product Description: • XJC-Y01-13-A adopts high-precision resistance strain principle; • Meet force measurement in the range of 0-100kg; • Capsule structural design,pressure-bearing, easy to install; • High quality stainless steel material; • Small size, beautiful appearance; • High response frequency;
---	---
